

# What to do

*IMPORTANT Parent or Carer –  
Please check that you are happy with any weblinks or use of the internet.*

## 1. Counting practice

- Count to five holding up one finger for each number spoken.
- Continue to 10, holding up the fingers on your other hand.
- Fold the fingers down.
- Repeat this, counting to 15, holding up one finger to match the ones / units in the spoken number, e.g. 11 (1 finger standing) 12 (2 fingers standing) 13 (3 fingers standing) etc.
- Continue to 20 in the same way.
- Repeat this but choose a new starting place. E.g. hold up 6 fingers and count from there.
- Repeat again, choosing a starting place between 10 and 20.

### Extension

- Count on from 20 in the same way.

## 2. Working together

- Play *Turn and Match* using your home-made cards.
  - You will need to make cards as shown on the sheet below. They need to be carefully cut out!
  - Then you can play the game using the scorer on the board *Turn and Match* below.

## Try these Fun-Time Extras

- Watch some ideas about bonds to ten  
<https://www.youtube.com/watch?v=PAV-gwoLTIs>
- Make your own hands-counter to show the pairs of numbers which add together to make ten.

## Turn and Match

You need your 24 home-made cards (see below this page)

### What to do

- Make your cards. You must cut these out carefully.
- Spread all the cards upside down on the table. No card must overlap another card.
- Turn over a card. Read the number. Turn over a second card. Read the number.
- If the two cards add to make 10 you can keep them!
- If the two cards do not add to make 10, turn them back over so they are face down. Try to remember where they are – it will help you later!
- Your partner has a go, doing the same thing.
- Have another turn. But this time, turn over a card you haven't tried before. Maybe one of the cards you turned over last time might match your new card to make 10? Do you remember where it was?
- Keep playing like this until all the cards have been taken.
- The person with the more pairs is the winner.

## Home-made cards

- Take an A4 piece of white paper.
- Fold an A4 page into half, into half again, into half again and into half again. (Folding 4 times!)
- Press each of the folds flat as you go.
- Open out until the paper is folded just in half.
- Cut along the folds.
- Continue cutting along the folds until your page is cut into 8 equal pieces.
- Spread out the eight pieces – these are the first set of cards!
- Take a pencil and write the numbers 1 to 8 on the cards.
- Do not press hard. It is very important that when you turn over the cards, you cannot make out the number.

### Now do this again TWICE

- On the second set of 8 cards write these numbers: 9, 10, 0, 1, 2, 3, 4, 5
- On the third set of 8 cards, write these numbers: 5, 5, 6, 7, 8, 9, 0, 10
